

Color Coated Aluminum Coil

Characteristics of Color Coated Aluminum Coil

Our paint suppliers are Beckers, PPG and Nippon. The Kynar500 PVDF coated coil has advantage in UV-resistance and color retention. PVDF paint warranty period is 15~20 years in exterior environment. Even 15 years later, it will fade little by little. With 12 years' experience in colored coil field, we provide various colors for your reference.

Application

- To produce aluminum composite panel or aluminum veneers.
- Used in exterior applications for decoration and protection of exterior wall,

canopy, roof and pillar, etc.

- ALUBANG coated aluminum coil is also ideal for interior decoration for wall, ceiling, bathroom and kitchen, etc.
- Used in advertising boards or shop front decoration.

As a one of the foremost coated aluminum coil manufacturers and suppliers in China, all coated coils are painted by our own coating production line.

ALUBANG can produce different aluminum coil coming with different types of coating, including, PVDF coated, polyester coated, brushed and chromate cleaning coils. Given below are the detailed specifications for your reference.
